Personal profile

I am a recent graduate with a Web Development degree, seeking an entry-level position. My university studies have taught me to be self-reliant; this was achieved through different approaches to programming and programming technologies outside my course. I managed to balance an accelerated degree with work which developed my time management and decision-making skills. Various team projects improved my communication allowing me to take the role of a team leader on many occasions. The perfect role for me would continuously challenge and encourage my skill growth.

Skills

Web Development:

- HTML5, CSS3, BOOTSTRAP
- JavaScript, Angular, jQuery
- PHP, Node.js
- MySQL
- Analytical skills
- Testing and debugging`

Soft skills:

- Effective communication
- Problem solving and resourcefulness
- Creative thinking
- Flexibility
- Open-mindedness
- Critical observation

Interests

I find appealing keeping up to date with the latest technology trends, understanding the evolution - both from a hardware and software perspective; I am always excited to try out new tech. My keen eye for beauty pushed me towards photography and editing software. I also enjoy outdoor activities such as: running, cycling and football.
